

ENG3004 Society and the Engineer – Group Worksheet

Group Number: _____ Date: _____ Dimension: Environmental

Name of group members present: _____

Group – Waste Management

 How recycling technology can keep Hong Kong's landfills from getting overfull? Please give examples or cases to support your answers.

Sustainable Development Goals

 On 25 September 2015, 193 world leaders have committed to 17 Sustainable Development Goals (SDGs) in the next 15 years (by 2030) to end extreme poverty, fight inequality and injustice, and fix climate change. The goals for sustainable development could get these things done in all countries for all people. Meanwhile, China is experiencing the largest scale of urbanization in history. Urbanization also brings in pollutions to the environment in China. Please suggest how to achieve the 3 SDGs on environment: (13) Climate Action, (14) Life Below Water, and (15) Life On Land in China.
